EXPERIENCE

Indian Army (509 Army Base Workshop).....
GenAI Systems Intern – 1 Year Jun 2025 - Present, Agra, India of Experience

Offline GenAI Document-Intelligence System

- Built and continue to maintain – over 1 full year – an offline GenAI document-intelligence system using Ollama and LangChain RAG to retrieve, reason over, and summarise defence documents.
- Designed multi-step LLM workflows with vector-store and buffer memory, tool integration, and ReAct-style reasoning for accurate, grounded responses in a mission-critical setting.
- Containerised and shipped the application with Docker and GitHub Actions CI/CD entirely inside a secure, air-gapped, no-internet defence environment.
- Sustained, year-long ownership of the system from prototype to a production tool used by workshop personnel.

PROJECTS

AI-Powered Crime Detection & Surveillance Dashboard...
React.js, Vite, FastAPI, TensorFlow, OpenCV, Docker, CI/CD

- Built a React.js (Vite) front-end rendering a live, geocoded surveillance map across 40+ cities, updated in real time.
- Integrated a GenAI/CV detection pipeline (TensorFlow, OpenCV) behind FastAPI, with CI/CD auto-deploying the front-end to Vercel and API to Render.

Playbook AI.....
React, TypeScript, Tailwind CSS

- Built Playbook AI, a wealth-management decision-support dashboard streamlining portfolio triage and advisor actions during market anomalies, with a fully responsive UI using Tailwind CSS and Radix UI.
- Architected global state management with Zustand, implementing async data flows to fetch, create, and update playbooks, client records, portfolios, and approval queues.
- Designed a role-based access control simulation for four personas (Lead Advisor, CRO, Portfolio Manager, Compliance Lead) with dynamic interfaces for multi-step approvals.

SUMMARY

GenAI & React.js developer with hands-on experience building LLM-integrated, full-stack web apps. **1 year of sustained experience** as a GenAI Systems Intern with the Indian Army. Oracle OCI certified in AI Foundations & Generative AI.

SKILLS

GenAI/LLM	Prompt Eng., LangChain, RAG
Frontend	React.js, Next.js, REST APIs
Backend/ML	Python, FastAPI, Node.js, PyTorch
Databases	MongoDB, PostgreSQL
DevOps/Cloud	Docker, AWS, Render, Vercel
MS Tools	MS Office, Excel, Power BI

EDUCATION

B.Tech – CSE **2022 - 2026**
Eshan College of Engineering (AKTU)

CERTIFICATIONS

Oracle Cloud Infra. 2025

Gen AI Professional, Multicloud Architect, AI Foundations, Foundations, Data Platform Foundations

Forage Simulations

Software Eng. (JPMorgan Chase & Co.), Data Visualisation (TATA)

NPTEL Elite

Manufacturing Process Tech. I & II (IIT Kanpur), IoT, Patent Law, Industry 4.0 & IIoT, etc

ACHIEVEMENTS

- Reliance Foundation Scholar
- NPTEL Certified
