EXPERIENCE

Aflix Infotech Private Limited.....

Software Developer

Aug 2026 – Present, Agra, India

- Developing and maintaining full-stack web and software applications, writing clean, efficient, well-documented code across **frontend** and **backend** components.
- **Debugging**, testing, and optimizing production applications; collaborating with the development team via **Git/GitHub** through code reviews and daily stand-ups.

Indian Army (509 Army Base Workshop).....

Software Engineer

Jun 2025 – May 2026, Agra, India

- Developed and maintained a **Python** backend for an offline GenAI document-intelligence system, integrating **APIs** and libraries (LangChain, FAISS, Ollama) into a production **RAG** pipeline.
- **Debugged** and troubleshooted issues throughout development; used **Git** for version control while collaborating with cross-functional teams on testing and improvements.

PROJECTS

AI-Powered Shoe Design Recognition & Matching Platform.....

Python, FastAPI, PyTorch, FAISS, React, Capacitor/Android

- Built a full-stack visual-search system using **FastAPI**, a **PyTorch**/DINOv2 embedding model, and a **FAISS** vector index to match shoe design photos against a catalog at 97.9% Top-1 accuracy and <100ms latency.
- Shipped cross-platform **React** web and **Android** (Capacitor) clients with camera capture, **REST APIs**, and a **SQLite**-backed admin console; personally deployed and maintain it on a **Hostinger VPS** behind Nginx.

AI-Powered Crime Detection & Surveillance Dashboard...

React, FastAPI, Python, TensorFlow/Keras, OpenCV

- Built a full-stack real-time dashboard covering 40+ cities, with a **React** frontend and a **Python**/**FastAPI** backend.
- Designed and integrated **REST APIs** with Server-Sent Events (SSE) for live data streaming into the React/React-Leaflet map interface.
- Trained a class-balanced **Scikit-Learn** Random Forest classifier for crime-risk prediction and hotspot scoring, with dynamic feature-matrix alignment for schema-safe inference.

SUMMARY

Software Developer with hands-on **full-stack** experience building web applications, **APIs**, and AI-powered tools using **Python**, **React**, and **FastAPI**. Comfortable debugging, troubleshooting, and collaborating with development teams using **Git/GitHub**.

EDUCATION

B.Tech – CSE

2022 - 2026

Eshan College of Eng. (AKTU)

SKILLS

Languages	Python, Java, SQL, Kotlin, HTML, CSS
Frontend	React, Android (Capacitor), React Native
Backend	FastAPI, Node.js, REST APIs
Databases	PostgreSQL, SQLite, MongoDB
Tools	Git, GitHub, Docker, CI/CD
AI/ML	LangChain, TensorFlow, PyTorch, FAISS
Analytics	Power BI
Cloud	AWS, Hostinger VPS

CERTIFICATIONS

- **Algorithmic Toolbox** – UC San Diego
- **Data Structures & Algorithms** – UC San Diego
- **Advanced Data Analytics** – Google
- **Generative AI Engineering** – IBM
- **Cloud Technology Consultant** – AWS
- **Power BI Data Analyst** – Microsoft
- **Intro to Cyber Security** – NYU Tandon

ACHIEVEMENTS

- Reliance Foundation Scholar
- Indian Army Intern
- NPTEL Certified
